**Dear Mrs. Obama and Ms.'s Daughters:**

**Fri, 9-22-16**

Just sit back for a minute, and imagine a place where all voting legal Americans could go and spend the night with somebody they love. Because we stated all legal voting Americans that means it would be very affordable and my friend Walt Disney wanted to do at Disney World before he passed. We talked for hours and Walt told me he wished this more than anything. Epcot Center at Disney World was supposed to accomplish this in affordable lodging and housing. Mr. Walt told me this on many occasions. He was a good friend of mine. Available next is a series of questions and answers to accomplish this. A. How many governors do we have in the United States? B. Is it true our country started in 1789? C. When did our country first get in debt? D. From 1790 to 1900 how many presidents paid down each year our debt? E. Did any of those presidents, during those first hundred and 12 years pay our debt off? F. About how many islands does Americans own in our Pacific ocean? G. Approximately, how many islands dose Americans own in the Atlantic Ocean? H. Is America collecting all the existing taxes that are legally allowed under existing revenue laws on all of our properties worldwide? I. Have we ever legally collected taxes like the Roman Empire did? J. Is it true our Founders of USA went for inches instead of metrics measurements? K. Why did we put our steering wheel on the left side of our automobiles instead of Europe on the right side? L. Why do men shave their beards in America and women shave their arms and legs? M. Is it true or false does our federal government give away some of their revenues to states, counties, or cities? N. Who has the biggest Air Force in the world? O. What country has the second largest Air Force in the world? P. What is the number of bone yards do we have in the United States? Q. How many in each state and what states are bone yards located in? R. Is it true we have 69 American paid for ships in San Francisco Bay? S. How many living American veterans are there in the United States that work for us under the American, military code of justice? T. Could our American vets volunteer to work and fix up our military equipment not being used in the United States? U. As voting Americans generate revenue from use of our planes, helicopters, ships, and equipment could be able to will sell or transfer it or emergencies or personal revenues? V. Developing 2000 shares maximum on each piece of their equipment and 2000 more shares when they work aboard said equipment? W. Could are retired voting Americans earn income from their house booking travels to our properties worldwide? X. Can we please put our people back to work in America using existing laws under the TOT taxes, revenues, as we renamed our codes to tourists on travel? Y. On a volunteer basis, could we use our people in jails to work, help pay down our debt, if they want to get out early, or if they want better food? Z. Could we use all of our state and-or federal lighthouse for birthday or celebration parties for voting Americans "Employment and-or Enjoyment" increasing our retirement incomes to supplement Social Security?

Finally we will be getting 20% tax payable to every government agency depending where affordable resorts are developed. **Payable at 14% federal**, 2% state, 2% County, and 2% city the depending on locations worldwide!

Thank you, Mrs. Melania Trump and Mr. Barron Trump... Sincerely, Dennis Hugh Conn, ToT USA revenue experts

23745 Del Monte Suite 153, Valencia, CA 91355 – 3375 661-414-4153, 254-4040, 818-357-5767, 213-304-6991.

I am the youngest brother too, in our family! \* A. through Z. answers maybe next page!

\* ANSWERS for OUR COUNTY to start **PAYING down OUR DEBT**, GUARANTEED by DC for **DC, Islands, & Bases!**

- A. 56 Gov.; Mrs. Obama, Daughters, 50 in states, one in DC, two on the East Coast by you, and three by me!
- B. Yes; not this many at first! Approximately 147 islands on the West Coast 40 by you on the East Coast!
- C. 1791 first year in debt, because of Army, Navy, Coast Guard, maybe national guard? = Militia then!
- D. President the second Adam, for four years and President Jackson for eight years to \$36,711.11 pennies?
- E. Yes, almost because our country could not find the final bill for \$36,000 approximate dollars.
- F. \* About hundred & 87 islands, 187 approximately islands; \* Go to **Guam**, then **Am. Samoa**, = 2 N. Y. **Eves!**
- G. Approximately 40 islands, some around Puerto Rico, and more around our three US Virgin Islands.
- H. No, not really because we were collecting tariffs, without income tax till Civil War, stopped; till 19th Cet.
- I. Answer is no because founding fathers wanted to get away from Europe and their behaviors and wars.
- J. Yes, because we want to get away from Europe & found the balance of power from 15,000 years of Gov.
- K. Europe; we were unhappy and found the American Indian way has a great formula of balance of power.
- L. away from Europe and learning from the first people and first nations equals great Constitution!
- M. Yes, it is very true and sad! We can pay our debt with this revenue for many years, in the past?
- N. United States of America, guarantee! Three in California, three biggest Arizona, New Mexico Texas etc.
- O. Guarantee, United States of America not being used in our deserts and warmer states 19 bone yards.
- P. 19, including helicopters for you and yours equals ownership if you help us out paying our debt!
- Q. Georgia, Arkansas, call us for details; 661-414-4153, 24 seven is a okay! Our ships going to waste! Why?
- R. Yes, but a lot of warships are good around our country, not as easy to find as the boneyards call us!
- S. Guess, PLEASE, We said Please... \_\_\_\_\_ Our State & CBO in Washington DC loved Plans, Etc.
- T. Yes, Guaranteed if Presidents, New B. of D.'s, and both members of Congress agree, please.
- U. Please vote yes, all voting Americans could agree use our properties, @ 661-414-4153; full information.
- V. Give our people something to do, for employment and enjoyment. Detailed plans and approvals finished
- W. To rephrase; for **employment and enjoyment**, give our **people something to do with fun** in the sun...
- X. We changed transit occupancy tax to Tourists on Travel TOT, or TOT existing laws worldwide.
- Y. \* **Roger Arnebergh**, California "**Law Revision Committee**" appointed by three governors, **president** etc.
- Z. \* Roger taught me how to do this, he made history in California and **Los Angeles** since **1781** and 1850
- He is a GREAT leader who helps us draft the legislation for state & federal use, as we worked together for years!

**CITY OF SANTA CLARITA  
NOTICE OF VACANCY ON THE CITY COUNCIL**

NOTICE IS HEREBY GIVEN that the City of Santa Clarita encourages residents to apply for a position to participate in local government as a result of the seat vacated by Dante Acosta upon his election to the California State Assembly. The person appointed to fill the vacancy will serve the balance of the term, which is currently scheduled to end on December 11, 2018.

Pursuant to Elections Code section 201 an applicant must be a registered voter 18 years or older and must maintain their principal residence in the City of Santa Clarita at the time of appointment and during their term of office. All applicants must submit their signed, original application and three letters of recommendation to the City Clerk's Office. Interested parties may obtain further information from the City Clerk's Office, 23920 Valencia Blvd. Ste. 120, or by calling 661-255-4391. Additional information is also available on the City's website at <http://www.santa-clarita.com/city-hall/city-council>.

All application papers must be received in the City Clerk's Office by the deadline at 5:00 p.m. on Friday, January 6, 2017. Applications turned in later than the deadline, postmarks, electronic submissions, and emails will not be accepted.

## These 21 Abandoned Military Bases Will Leave You Speechless? bill Clinton 1986? WHY? FORT ORD? #18/63? WHY?

Camp Ord was built during World War I and was initially used as an artillery training field for the army. The camp was **expanded in preparation for World War II**, and was renamed Fort Ord. After being used for a host of different military training initiatives, **this fort was closed in 1994. Many of the buildings sit unused and in various states of decay.**

If the outside of Fort Ord's abandoned buildings weren't creepy enough, **the interiors are simply haunting. Layers of graffiti and garbage hide what was once the envy of the army's training stations. The darkened buildings** are a stark contrast to the sunny weather found at this **Monterey Bay** military location.??? **WHY???**

FLORIDA = The pyramid in Nekoma, North Dakota may look like an abandoned alien landing site, but it was once a modern marvel of the military. This site was built as part of the Safeguard Program, part of the anti-ballistic missile defense system. One of several sites planned under the project, Nekoma was the only one that was operational.

### 19/63

The pyramid in Nekoma, **North Dakota** may look like an abandoned alien landing site, but it was once a modern marvel of the military. This site was built as part of the Safeguard Program, part of the anti-ballistic missile defense system. One of several sites planned under the project, Nekoma was the only one that was operational.

### 20/63

Buried underneath The Greenbrier, a 4-star luxury resort, is the former top-secret bunker intended to house the United States Congress in the event of a nuclear holocaust. Dubbed Project Greek Island, the facility was never used by the government. It remained active until an intrepid reporter announced the super-secret location. # 16/63? WHT?

**15/63 TITAN I USA** = QUITE? PLEASE? Designed to house the United States' first multistage rocket intercontinental ballistic missiles (ICBMs), this series of three underground bunkers remain a creepy nod to the Cold War. Each of the silos doubled as a nuclear fallout bunker, and featured water treatment facilities, fresh air systems and food supplies to last the military personnel through the nuclear apocalypse.

Hashima **Island, otherwise known as Battleship** Island, is a completely abandoned site located near Nagasaki. The site's concrete buildings have succumbed to the ocean air, plant growth and local wildlife. The island serves as a staunch reminder of **Japan's** past **site was built using Chinese prisoners of war and Korean citizens forced into slave labor.**

City of Santa Clarita

letter of intent for counsel appointment

November 27, 2016 Sunday

*"Rough Draft"*

Dear Mayor, Council Members and City Manager:

It has come to my attention recently that there was an open seat on the city Council. For this fundamental reason I've never applied for an appointment for this position. I'm willing to work very hard and commit to donating half of my paycheck to the members listed above equal shares if that is possible. The purpose of that is each of you deserves more payments than I do not need the full mouth so I'm working for half price if that's possible? I'm also willing to work for a minimum of 40 hours a week during the operations of City Hall, for purposes of the city in any way I can. The areas of expertise because of Sydney on the general plan and we first started the city would be for easing the traffic congestion within our city to help it all people living in our cities boundaries as well as the outlying area to work faster as well as arriving home sooner by relieving some of the traffic during rush hours. The next areas I can help the city from 1998 to 2002. Our campaigns for city Council I helped out the 11 recommended getting copper hills through as the people in the industrial center candidates forum most 11 did look at map where Copper Hill was shown the value of our residents to get between Bouquet Canyon and 126-I-5 Freeway intersection, as we all reviewed my maps. I will produce letters from all levels of government explaining our ideas will work to lessen traffic congestion from upper government.

Parks and Recreation I will be able to help generate some revenue that is always needed for city. But also show how to get through the center of the city with the plan hundred ENG roads with water runoff designed in a new format for city. We can also work some plans for the LA to San Francisco rapid system

Be able to explain and see Joanne Darcy who has my maps of city planning that I gave her at City Hall many years ago on the Chamber of Commerce maps. We can use Charlie Canyon to annex portions of Castaic Lake two separate choices. Another choice from San Francisquito Canyon Road that leads over to Lake use for revenues of Castaic Lake east and West and for some city growth of annexation. Into our city for recreational use such as, but not limited to restaurant with a view, a hotel with a view, the Greek theater type of development, as well as the Hollywood bowl type plans, which could be called SCV bowl or Santa Clarita bowl; thus some nice orchestrate music and production for citizens. Another choice with your approval would be a heliport landing County, State and Federal government visits to increase funds that will be available. In closing you will be able to have a large increase in revenues for city of which maybe I could be paid one half of 1% of the revenues we generate if that is possible and subject to your approval.

I also do not need health care to save the city some money as I have veteran's benefits as well as Obama care. I promise to never make long speeches to slow down the cities movement and means of production at any meeting, at any time. I Promise to keep my answers short, valuable, and to the facts.

Sincerely yours to help,

*Dennis Hugh Com*

**Letter of Intent: "Voting Americans Applying Common Sense" 7-15-16 Friday**

Dear *voting Americans* who really care about *our country*:

This quick one-page information will explain why Americans are so upset. Please immediately deliver this to the person in charge of our organization for delivery to the proper authorities, because of the election-year. Here's why; imagine buying a new Ford Chevy or Dodge automobile, in order for it to start or run you must buy their cartridges and filters. Take this a step further and imagine buying a Ford going to the gas station to refuel and the attendant says were sorry but we are Chevy gas only! You must go eight blocks south to the Ford gas station... Now take this another step, imagine paying \$100,000 for the sports car and just the necessary maintenance and now for the filters, gas or oil its \$140,000? This is what the printing companies selling in the United States have done to us for the last 15 to 25 years? We have allowed this to continue because we want to be politically correct or just nicer to everybody. Why? Well it all started in the 80s to get out the vote for people's wishes running our government. WHY?

For example; Tip O'Neal and President Reagan from 1986 passed sad laws without asking us about changing our American way of life? Better example; Last President that paid our Debt was Eisenhower in 56 & 58' Plus building the interstate highway system. Pres. Kennedy had a new program to put a man on the moon within the next 10 years plus Nixon was the one that answered the phone from the Moon call? Figure that one out. Next example; We could have charged Neil Armstrong that everybody remembers his name, some fees like Russian charged the \$20 million to put a man up, when we had trouble with the space shuttle. Taken to the next step; The day after Pearl Harbor, on December 8, 1941 our federal government was buying 700 Acres resort in Norco California. We never paid for five years from the man that was in financial trouble. On that date: 8 December our government already knew to put the sailors, United States Navy inland from Long Beach away from Hawaii, because of the trauma they experienced from Pearl Harbor attacks. Navy weapon yard owns this, but it's nowhere near an ocean, just like in Orlando, so they can have trips to Disney world, at a naval weapons yard in Florida, middle of the state nowhere near water, "very similar" to Norco, CA. Kennedy gave 100 acres for \$1 of our 700 resort to the State of California for Rehabilitation Center it's Norco jail-tent? Max Jail of CA's?

Johnson gave away the fish hatchery in Austin Texas three days before he left office to his brother without asking us!!! I feel they have a right to ask us what they're doing with our property not give it away to a relative. Carter did the same thing, given away the Panama Canal instead of renting it out, as I've heard China has some of the locks, Bldg's operated, why? These fundamental reasons people get upset at our leaders given away something of value; without having to vote by to the American people, who paid for it by our taxation. Type in "NGA" and see our national Governors Association then see and you'll find out we believe every year in January, although 56 governors go to the White House, have a meeting with all the governors of our nation's property and territories. "Now imagine" going to Guam for New Year's Eve on one side of the International Date Line and the next night going to American Samoa not far apart and having two New Year's Eve's one night apart.

No other country in the world that I know of, owns both sides of international date line close to each other for two birthdays two Hanukkah's, two Christmases, two Easter's, two anniversaries, wow, now folks we can start having Great Fun in America, our bases, our islands, about 187 total, with 40 in the

1 East with one Governor in DC, two on the East Coast and three on the West Coast. Publicist get along  
2 that one-page so I must edit it, correct it, along with a few other ideas.

3 If you spend the night on federal property that money should go into the federal government to help  
4 pay our DEBT, correct? For example; if a property touches the national Forest or Park, you can only put  
5 one house per 5 acres not 5 to 7 houses per acre like generally the homebuilders do. You can fit a great-  
6 er quantity by going to condos and apartments, but the highest and best use of all acreages are keeping  
7 it simple the camp resorts which are allowed to put 30 units per acre. If you know anybody in LA County  
8 has over 5 acres available call us at 661-414-4153 we will help them get the permits approved, put up  
9 front moneys... As we've never been turned down on any affordable fun family resorts for the common  
10 people in America that could vote. ASAP, watch Seabiscuit the movie with Jeff Bridges!!!

11 If you understand the Rates of property investment, then CAP rates tell from the time you put your  
12 money down until the time you get your money back on commercial, *resort* commercial, and places to  
13 live around the United States in New York its apartments in California it's condo's. The reason why if you  
14 can get your money back in a shorter period of time we can start taking care of the voting poor, these  
15 steps are what all the good books say to do is to help the common voting Americans. Imagine taking the  
16 JFK aircraft carrier from LA to Hawaii for \$25 a night... It takes about four nights so your cost would be  
17 one hundred dollars including your car or \$80 one-way for just you... When you get to Hawaii or any of  
18 our bases, 187 islands, and territories around the world, you would have your car with you or could have  
19 your car with you... Because aircraft carriers hold about 5000 people one thousand cars and they are like  
20 miniature cities... You will see a picture of one being sunk off the coast of Florida for the fish to swim in  
21 and out of??? WHY??? We could be going to the hundred Islands off the coast of Florida not counting  
22 Key West... Now imagine; putting your car into our retired C-130 which holds about 10 cars and 100  
23 people and flying back from Hawaii in four hours approximately another hundred dollars, with landings  
24 at Van Nuys or Santa Monica airport. Sounds like fun, what do you think? Let's give our people

25 something to do for employment and enjoyment; for those of us who are working hard paying TAXES!  
26 This includes voters especially the vets' ability to go to highway 14 N. across Edwards Air Force Base and  
27 down Highway 15 S. & view our planes we own? NEXT going to Arizona, New Mexico, & near El Paso...  
28 Wow the vets that are used to working on them, traveling to their destinations around the world,  
29 sounds like fun yes? But take it a step further going to Germany on the C-130 from New York to one of  
30 our bases, spending the night in our "Amelia Earhart Hotel" built during the Eisenhower administration,  
31 remodeled during Nixon, used by the people that were held in captivity for 400+ days in Iran and again  
32 remodeled during the Clinton Administration, it's about 14 stories tall. Give our Voters something to do,  
33 for employment and enjoyment. A few weren't reading this part its turnaround; for **employment and**  
34 **enjoyment; give our people Suppan to do! People will vote for this; GUATANTEED!**

35 Sincerely yours to help, with tourism and the TOT assets transit occupancy tax; Tours on Travel,  
36 *Dennis Hush-Corn*

Dear Mr. and Mrs. Richard Patterson, friends and Associates: Letter of Intent December 31, 2016

It has come to our attention that saving the 2% of our freshwater worldwide would make sense, and stopping the flow to the saltwater in our snake River, Columbia River Gorge, Mississippi River, great lakes and lower inside passage. This would benefit our Great Salt Lake in Utah, what Sonny Bono asked me to help him save, which is the Salton Sea in California, and of course our Dead Sea near Jerusalem. By giving our people something to do, for employment and enjoyment hope all these above mentioned programs and projects.

Please note: rough draft, first!

Lots of our family members and friends were invited to the opening of the second largest Church of Jesus Christ of Latter-day Saints in Los Angeles on Santa Monica Blvd. when it was brand-new. We went through the complete Temple before was open as guests and we enjoyed every room in our christening of our Temple. I visited many time with the missionaries always buy them hotdogs at Santa Monica pier and treats of whatever they wish over viewing our Pacific ocean. With this in mind about 75% of our Earth's surface is saltwater and as described above 2% freshwater. So it makes humans sense to save all the fresh drinking water not only in North America but also where Jesus walked in our holy lands to make him glad and proud of our efforts.

We have three names of minor change to our great salt lake by adding an S to get a worldwide attention of the name change as well as the chance to bring more members into our church. The three names ready for your approval would be the great salt lakes, greatest salt lakes, and greater salt lakes. This would include benefits from the Antelope Island, Fremont Island, Farmington Bay, Bear River Bay, and Are Migratory Bird Refuge. Our new projects would improve the land value, church recreational value, plus the cities would enjoy additional revenues of Farr West, Willard, Terry, Ogden Utah, Brigham City, Roy, Clearfield, Leighton, bountiful, Salt Lake City, West Valley city, a Reignite, as well as all the land and shoreline of our beautiful Lakes. With lights reflecting on both sides of our 3 to 4 possible lakes that we have designed for you and all future American members for use at your wishes.

We have devised a new tax system that brings in the 20% tax that goes to city, 14%, 2% County, 2% state, and 2% federal with their wishes and help from our Army Corps of Engineers. I was chosen years ago by the LA section of our Army Corps of Engineers to help in the development of Santa Fe damn for employment and enjoyment centers. They asked me in their LA office after seeing my plans, on other projects, they were excited and sent to help in that area from the water coming out of the Angeles national Forest... We also doubled and tripled the income at White rock Lake, tripled the income of Spring Valley Ranch and Lake with fishing, fisherman's retreat on the way to Palm Springs, and for Dr. Lloyd at his second search the above your type of California near Yogi bear Yellowstone resort as well as thousand trails, American trails, places camp resort in Robin's nest camp ground, all located in California as well as I hoped in several other areas of foreign governments North and South of Ensenada, Mexico. I was asked to go to Russia during their down fall by the state of California to help build resorts at a fee of \$10,000 a month income that I'd turn down because to live there it cost you 5000 a month and I try to work in North America, islands on both coasts, and are bases around the world of 91. Fundamental reason is a try to keep the revenues coming in to America's treasury for mutual benefit as a government sometimes pays all of us different benefits. We are in trouble right now is a huge debt and are TOT revenue will be the highest and best use possible. The TOT stands for transit occupancy tax which we renamed to tourists on travel. I have helped Rick Patterson, and then he has helped me on several different projects over the years. He is a neighbor and a friend here in

Valencia since 1970's. I have asked him to help me find the contacts at our Salt Lake capital top, Temple, LDS business building and other places he might know of on my next trip to the great Salt Lake's I edit the S is we can make a fishing swimming and boating section as well as bring the flavor of the air 200% perfection 24 seven as well as 365 days a year for employment and enjoyment of our brothers and sisters.

Sincerely yours,

Dennis Hugh Conn

please remember; first draft!

Rough draft to rush and finish off this old year... Happy New Year! Please make corrections, revisions and return it as soon as possible so we understand what changes you want to make on this magnificent project for our people for our brothers and sisters to!

A simple idea for next year, during Christmas. Merry Christmas to remind everybody that Merry Christmas stands for capital MC, happy holiday's stands for HH, and happy Hanukkah also stands for H. H. So why change MC to HH when we could simply have told the first person that started cyan happy holidays to save Merry holidays. December 2, Merry Christmas of course, merry Kwanzaa, and Mary Hanukkah us, because if your wife's name was Mary spelled a little different than Merry Christmas that you get the idea that she would enjoy hearing her name as well as the people would enjoy a Merry new years in December and on January 1 we could continue with happy New Year's. This people got on or didn't understand we could remind them why not be merry half of the year which would include Mary Valentine's Day, Merry Easter, Merry Memorial Day, and Mary Fourth of July. This can later be explained that if 11 months are happy in the Jewish highest holiday is in September all three of the others and it ends with the feast of Tabernacle which is when everybody should gather together intense and Shaw enjoy everything in common I'm tired now it's time for me to go to bed so please make any corrections as I will run the spell checker to make sure and my grammar X but I'm counting on you to make any revisions because time is valuable and let's start off the new year with these row grizzle relations resolutions etc. make the great sea and the great salt lakes even greater part may come the greatest in the world which will bring in more members and help grow the church. Thank you very much remember Rev. Wolf of Wolf Road named after my grandfather and great-grandfather from Des Plaines Illinois that runs from the Des Plaines River in Illinois to the Illinois River is one of the longest running roads by airport which was my grandfathers church which they moved in the 50s but also they moved his graveyard now to make room for the largest airport again as O'Hare Airport drop-down to the third largest in the world but because of the new super planes they had to move the graveyard which was on both sides of the FedEx building at O'Hare and national airport near Chicago Illinois where my great-grandfather cut: the God where he taught seven languages at the University of own eyes before he became Rev. Wolf. I mothers name is Wolf and Theodore Wolf was his son owner of the dealerships around Chicago for the grant automobile. Mr. Durant started General Motors, left General Motors to make his own car company called the trans-the specialized in the first limousines in the 1918 soon 1920s and by 1929 with the depression he went back to General Motors.

I Found Trillions of  
\$\$\$ For our U.S.A.

We need your help in getting this through to our Leadership for the next two days before 7 PM! You and yours have been selected to help us on the new formation of the Department of Revenues.

Dear Governors of Political Leadership:

Wednesday, July 20, 2016

our voting American public needs something to look forward to in this upcoming election November 8, with this in reason we offer you several solutions on several pieces of paper as well as full Internet connections, through Google searches as well as verbal contact at As of business cards attached show the revenue billions and trillions of dollars to help pay down our debt. The existing taxes are not being collected on federal property, and should be placed into our treasury to pay our debt! Search Google for El Toro Marine base retired at the why of the five and the 405 freeways in Southern California. You will find a perfectly good airbase and field with motor homes parked on it? We need every airfield available as most of the people in California lived between my house and San Diego orders. We found the revenue paid down our ills from over spending.

I made up a list of the first things that are available for the first day in office. We also found money available to state run lighthouses, all parks and forests from the transit occupancy tax, TOT tax, renamed to tourists on travel. This tax built the biggest revenue producing country ever existed. That is why it's urgent to get a Department of Revenues started as soon as possible. We can shrink down the other departments like health, education, etc. of your choices. If we used all of our islands, parks and forests, lighthouses, bases and existing federal property we can start turning our debt around immediately.

The Congressional budget office, CBO, enjoyed our ideas and formulas to fix and pay down are debt. If we give our people something to do, for employment and enjoyment they shall be pleased in their endeavors as happy Americans. **Please see state attached letter from the senior environmental specialists in Los Angeles California. If we use all available roads at a 24 seven pace we have less traffic and fit more people in the time zones available, such as day shift, evening and graveyard shift as the people in the health care at hospitals and police work know about proper scheduling.**

**I guarded Pres. Johnson from 1966, 67, and 68 at Fort Hood Texas, Stonewall, Texas his ranch as well as any place he had to be lifted around in the world. Three years after Kennedy was killed. President Johnson would be out in the field during training, dedicating our college in front of Fort Hood Texas as well as any other place he had to go on helicopter for emergencies, around the world. During my six year obligation but the military police, 10 years in finance, 10 years in insurance and investments, about 10 years in building commercial, residential but mostly recreational, including RV resorts. We learn about the Rates, CAP Rates of one to put your money in and then when you get your money back is owners not renters than the federal government would be getting rates permanently as long as we are in assistance. Existence is important to revenues keep at a minimum possible rate.**

**Please call as soon as possible as we must get this fax to you for the deadline Thurs. night. Please get a hold of our leader because I don't have the connections that you do. I really appreciate this for your help! D. C.**

Dear Trey Gowdy; dear Mr. President Obama, presidential candidates, CBO and Congress: 10-22-16

I'm writing to all of you because we could create an apartment of finding revenues for our United States. This was generate funds to help pay down our debt as well as guaranteed to voting Americans that we are doing up our jobs for betterment of our country. For fundamental reasons alone the first hundred and 15 years also the presidents paid the bills and in the 12 year. Two presidents paid our debt completely off. Since 1900 to today only five presidents have paid down our bills, debt, and one even generated \$2 billion during his six-year term. Remember the business of America is business; of course it's silent Cal Coolidge. Even Pres. Hoover, remembers Hooverville, Hoover blankets = newspaper etc.

When we were working on saving the Panama Canal in 1998 went to the largest library in the San Fernando Valley figuring in 15 min. the librarian should be able to find our current debt the last five years. I received a flyer that stated with the graft the last five years the president went up another trillion dollars. Why when they were telling us different? Start a half later nobody in the library largest in SFV, California could not find the debt in the two 8 inch thick budget of the United States. I found on page 55 that that organization in the industrial center of Valencia California was correct because it showed a 1 trillion increase in the last five years of his presidency. So I started searching immediately under US debt to find a solution I stated above.

It took me several years and a lot of work going through every month every year and around the middle of April I found our debt going down? Unusually found during the 19th and 20th century? After checking daily and monthly and yearly I was exhausted, and then it hit me what a light bulb going off it was April 15 tax time and April were sending their money in sword that was going down for about 2 to 3 weeks.

Started the largest city ever formed in the history of California, Santa Clarita where I live in Valencia, CA on 12-15-1987. So we went to all the major cities around Los Angeles, found some key issues and continued with Palm Springs, Branson Missouri, New York, Las Vegas and enclosed you will find graphs of millions, and billions of dollars you can generate right here in America. Starting from 1789 we paid millions of dollars off quickly into small debt left in 1791, through 1800. \*In 2006, others, etc., we found some very interesting formulas of generating revenue for our country. \*This in mind, it would be great if we could be paid for the work, and the efforts of others who help in the endeavors! Searching everything about the countries in our world, we found more information. We also found trillions of dollars that can start being collected on all our government properties, lighthouses, islands, territories and bases around the world. This is existing Tax revenues since Rome. We call it Transit Occupancy Tax that nobody ever talks about! TOT revenues; we change the name to Tourists on Travel "ToT" which just about everybody approves. *Make sure everybody in all government agencies gets paid on collection of existing revenues, we shall collect the 20%, paid at 14% fed, 2% state, 2% County, and 2% city depending location so everybody involved is paid to help our country.* Please see existing letters blueprints, etc.

Sincerely yours, Dennis Hugh Conn

Above has been sent to Billionaires o.k.!

Please

It is come to our attention recently before during and after the debates, that the needs of the Americans be accomplished through the travel industry. Tourists on travel are the most vital important part generate revenue\$, along with happy voting Americans creates need of employment and enjoyment. It will be mutually advantageous for each candidate for president to asked the people investing for one of the three choices for leaders in Washington; 607 of them! These donation amounts will be for the A, B, and C, figures following. Figure A will be for \$54,600, figure B before \$47,600, and figure C will be for \$34,300. Figure A would be the best as the monies should be held in trust. We need to start in January. Maybe B figure or the C figures, per AAA and then a quick upgrade within four months to the figure A.

The four months is for the memberships the first four months because that's the way the company starts out their Club programs. Ask why? Our legal voting citizens need something to do, in America, by American's; for "Employment & Enjoyment". The missing TOT revenues we believe occurred... Perhaps in all of our 44 presidential terms! For this fundamental belief alone will help greatly reduce our trillion dollars debts. It is vital to have our professional travel specialists reached immediately, for those selling travel throughout our USA we've discovered the missing revenues not collected by our government. If we get started right now we can start paying down our debt much faster.

Currently, in Washington DC we have 607 leaders running our government, so we believe they need the power of our tourists industry with travel benefits from Auto Club throughout our nation lands **needed** by AAA travel? Some of our leaders will have AAA service already so they will have options of increasing to the premium membership which includes 200 miles, +200 mile totals along with the very best of benefits. These actions & funds above should give us the edge that we need in the travel industry overnights. We will create revenue\$ from the old Transit occupancy Tax, renamed "Tourists on Travel" ... Thus, new programs explaining our concept of generating revenues to pay down our debts... Please call us as listed below for any questions you have 24/7, or the new 16/7 that some of our companies are doing now. Voting Americans will also get more benefits with the following letters soon! \*Why 607?

Sincerely,

PLEASE NOTE: 2<sup>ND</sup> DRAFT; PLEASE MAKE ANY CHANGES

Dear presidential candidateEL2-ToT.DocX7

Dennis has more vital voting American info coming soon, GUARANTEED...

## These 21 Abandoned Military Bases Will Leave You Speechless? bill Clinton 1986? WHY? FORT ORD? #18/63? WHY?

Camp Ord was built during World *War I* and was initially used as an artillery training field for the army. The camp was *expanded in preparation for World War II*, and was renamed Fort Ord. After being used for a host of different military training initiatives, *this fort was closed in 1994. Many of the buildings sit unused and in various states of decay.*

If the outside of Fort Ord's abandoned buildings weren't creepy enough, *the interiors are simply haunting. Layers of graffiti and garbage hide what was once the envy of the army's training stations. The darkened buildings are a stark contrast to the sunny weather found at this Monterey Bay military location.??? WHY???*

FLORIDA = The pyramid in Nekoma, North Dakota may look like an abandoned alien landing site, but it was once a modern marvel of the military. This site was built as part of the Safeguard Program, part of the anti-ballistic missile defense system. One of several sites planned under the project, Nekoma was the only one that was operational.

### 19/63

The pyramid in Nekoma, *North Dakota* may look like an abandoned alien landing site, but it was once a modern marvel of the military. This site was built as part of the Safeguard Program, part of the anti-ballistic missile defense system. One of several sites planned under the project, Nekoma was the only one that was operational.

### 20/63

Buried underneath The Greenbrier, a 4-star luxury resort, is the former top-secret bunker intended to house the United States Congress in the event of a nuclear holocaust. Dubbed Project Greek Island, the facility was never used by the government. It remained active until an intrepid reporter announced the super-secret location. # 16/63? WHT?

**15/63 TITAN I USA** = QUITE? PLEASE? Designed to house the United States' first multistage rocket intercontinental ballistic missiles (ICBMs), this series of three underground bunkers remain a creepy nod to the Cold War. Each of the silos doubled as a nuclear fallout bunker, and featured water treatment facilities, fresh air systems and food supplies to last the military personnel through the nuclear apocalypse.

Hashima *Island, otherwise known as Battleship Island*, is a completely abandoned site located near Nagasaki. The site's concrete buildings have succumbed to the ocean air, plant growth and local wildlife. The island serves as a staunch reminder of *Japan's past site was built using Chinese prisoners of war and Korean citizens forced into slave labor.*

14/63 BELOW HAWHAWII     21 Abandoned Military Bases Will Leave You  
Speechless bill Clinton 1986

Kalama Atoll is what the locals call Johnston Atoll, and the name sounds a bit more becoming of a land situated on a coral reef bed. Unfortunately, the land is contaminated from years of chemical weapons testing and storage.

The U.S. Fish and Wildlife service visits annually to monitor the situation, but it looks like this land will stay unoccupied, haunted by ghosts of the past.

Johnston Atoll was "gifted" to the United States Navy by President Franklin D. Roosevelt in 1934. It was to be used simultaneously as an air station and a bird refuge. While this may not sound all that haunting, consider this: the land was also used as an Agent Orange dumping site and a testing grounds for nuclear and biological weapons? Why???

13/63

ISLAND

FORT TILDEN 8/63 =USA = The Borough of Queens is home to one of the most haunting abandoned military bases in the United States. Fort Tilden, was once used as a coastal artillery installation.

During the Cold War, the site was used for anti-aircraft guns and Nike surface-to-air missiles. Today, Fort Tilden is under the operation of the national park service, and it has become popular with fishermen and bird watchers.

**DEVIL'S SLIDE BUNKER = 1/ OF 63? WHY?**     Nestled in the Devil's Slide promontory on the coast of California, the Devil's Slide bunker sits as a ghostly reminder of the Japanese threat that loomed just across the ocean.

The bunker is just one of several buildings used to keep watch over *the San Francisco Bay*, and the military personnel would sit inside this observation post with binoculars, searching the waters for signs of enemy activity.

Scattered throughout Germany, you can find 16 flak towers like this one. Part anti-aircraft defense, part air raid shelter, these giant towers served as multipurpose war command posts.

All of the towers were designed by architect Friedrich Tamms, and they were built using slave labor under Nazi control.
